

American Roulette

American Roulette

American Roulette is an exciting, fun-filled casino game with a wide variety of bets. All you need to know is how to place your bets. We hope you enjoy playing American Roulette with Sun International.

The Aim of the Game

The object of American Roulette is to guess on which number on the wheel the ball will come to rest. Every number has the same chance as any other of coming up on each spin i.e. the winning number on any spin has no effect on the outcome of the next spin.

The American Roulette Wheel

The American Roulette wheel is made up of 37 segments, numbered from zero to 36 with 18 black numbers, 18 red numbers and one green, zero.

American Roulette Bets and Payouts

American Roulette allows players to make a wide range of betting options. Refer to the payable for easy reference.

American Roulette Chips

American Roulette is played with special chips called colour chips. When you buy at the table, using your cash or MVG smart card, you will be given your own uniquely coloured chips to distinguish your bets from the other players. You determine the value of your chips when you buy in at the table, the table minimum is clearly displayed on each table. When you have finished playing, your colour chips must be exchanged for casino value chips as they cannot be used anywhere else in the casino.

When Zero Wins

- All dozen and column bets lose.
- Even bets lose half of the wager.
- All other bets not placed on zero or combinations of zero lose.

Placing your Bets

Before spinning the wheel the dealer will announce the start of a new game by calling, "Place your bets".

The dealer will spin the wheel and you may continue to place bets until the dealer calls "No more bets". No further bets will be accepted after this announcement.

Remember you are responsible for placing your chips correctly as each bet will be paid out in strict accordance with its position on the table when the ball rests.

The dealer will call out the winning number, its colour (red or black) and place a dolly on the winning number.

The table is cleared of losing bets and then the dealer will pay out the winners, announcing the amount of winning chips for each colour being played.

Remember

The dealer is there to help you, please don't hesitate to ask for assistance at any time. We sincerely hope you enjoy your experience when playing American Roulette at Sun International Casinos.
